

ECKMÜHL

First Clash of Napoleon's 1809 Campaign

Terrain Effects Chart

Terrain Type	Movement Point Cost	DRM (Fire Combat)	Column Shift Left or Right (Melee)
CLEAR	1	None	None
 ROAD	2/3	as other terrain ¹	None
 TRACK	1 ²	as other terrain ¹	None
 WOODS ³	2 ⁴ (cavalry disrupt on die-roll of 1 or 2)	-2	L1
 VILLAGE ⁵	1	-3	L2 ⁶
 RATISBON ⁷ WALL	+1	-5	L4
 MARSH	3 (all units disrupt on a die-roll of 1 or 2)	None ⁸	L1
 DANUBE ⁷	Impassable	as other terrain	Impossible
 STREAM	No extra cost	as other terrain	None
 ROUGH ⁹ (HIGH)	2 (French units disrupt on a die-roll of 1, Austrians on a die-roll of 1 or 2)	-1	L1
 WOODS/ROUGH (HIGH)	2 (All units disrupt on a die-roll of 1 or 2)	-2	L2

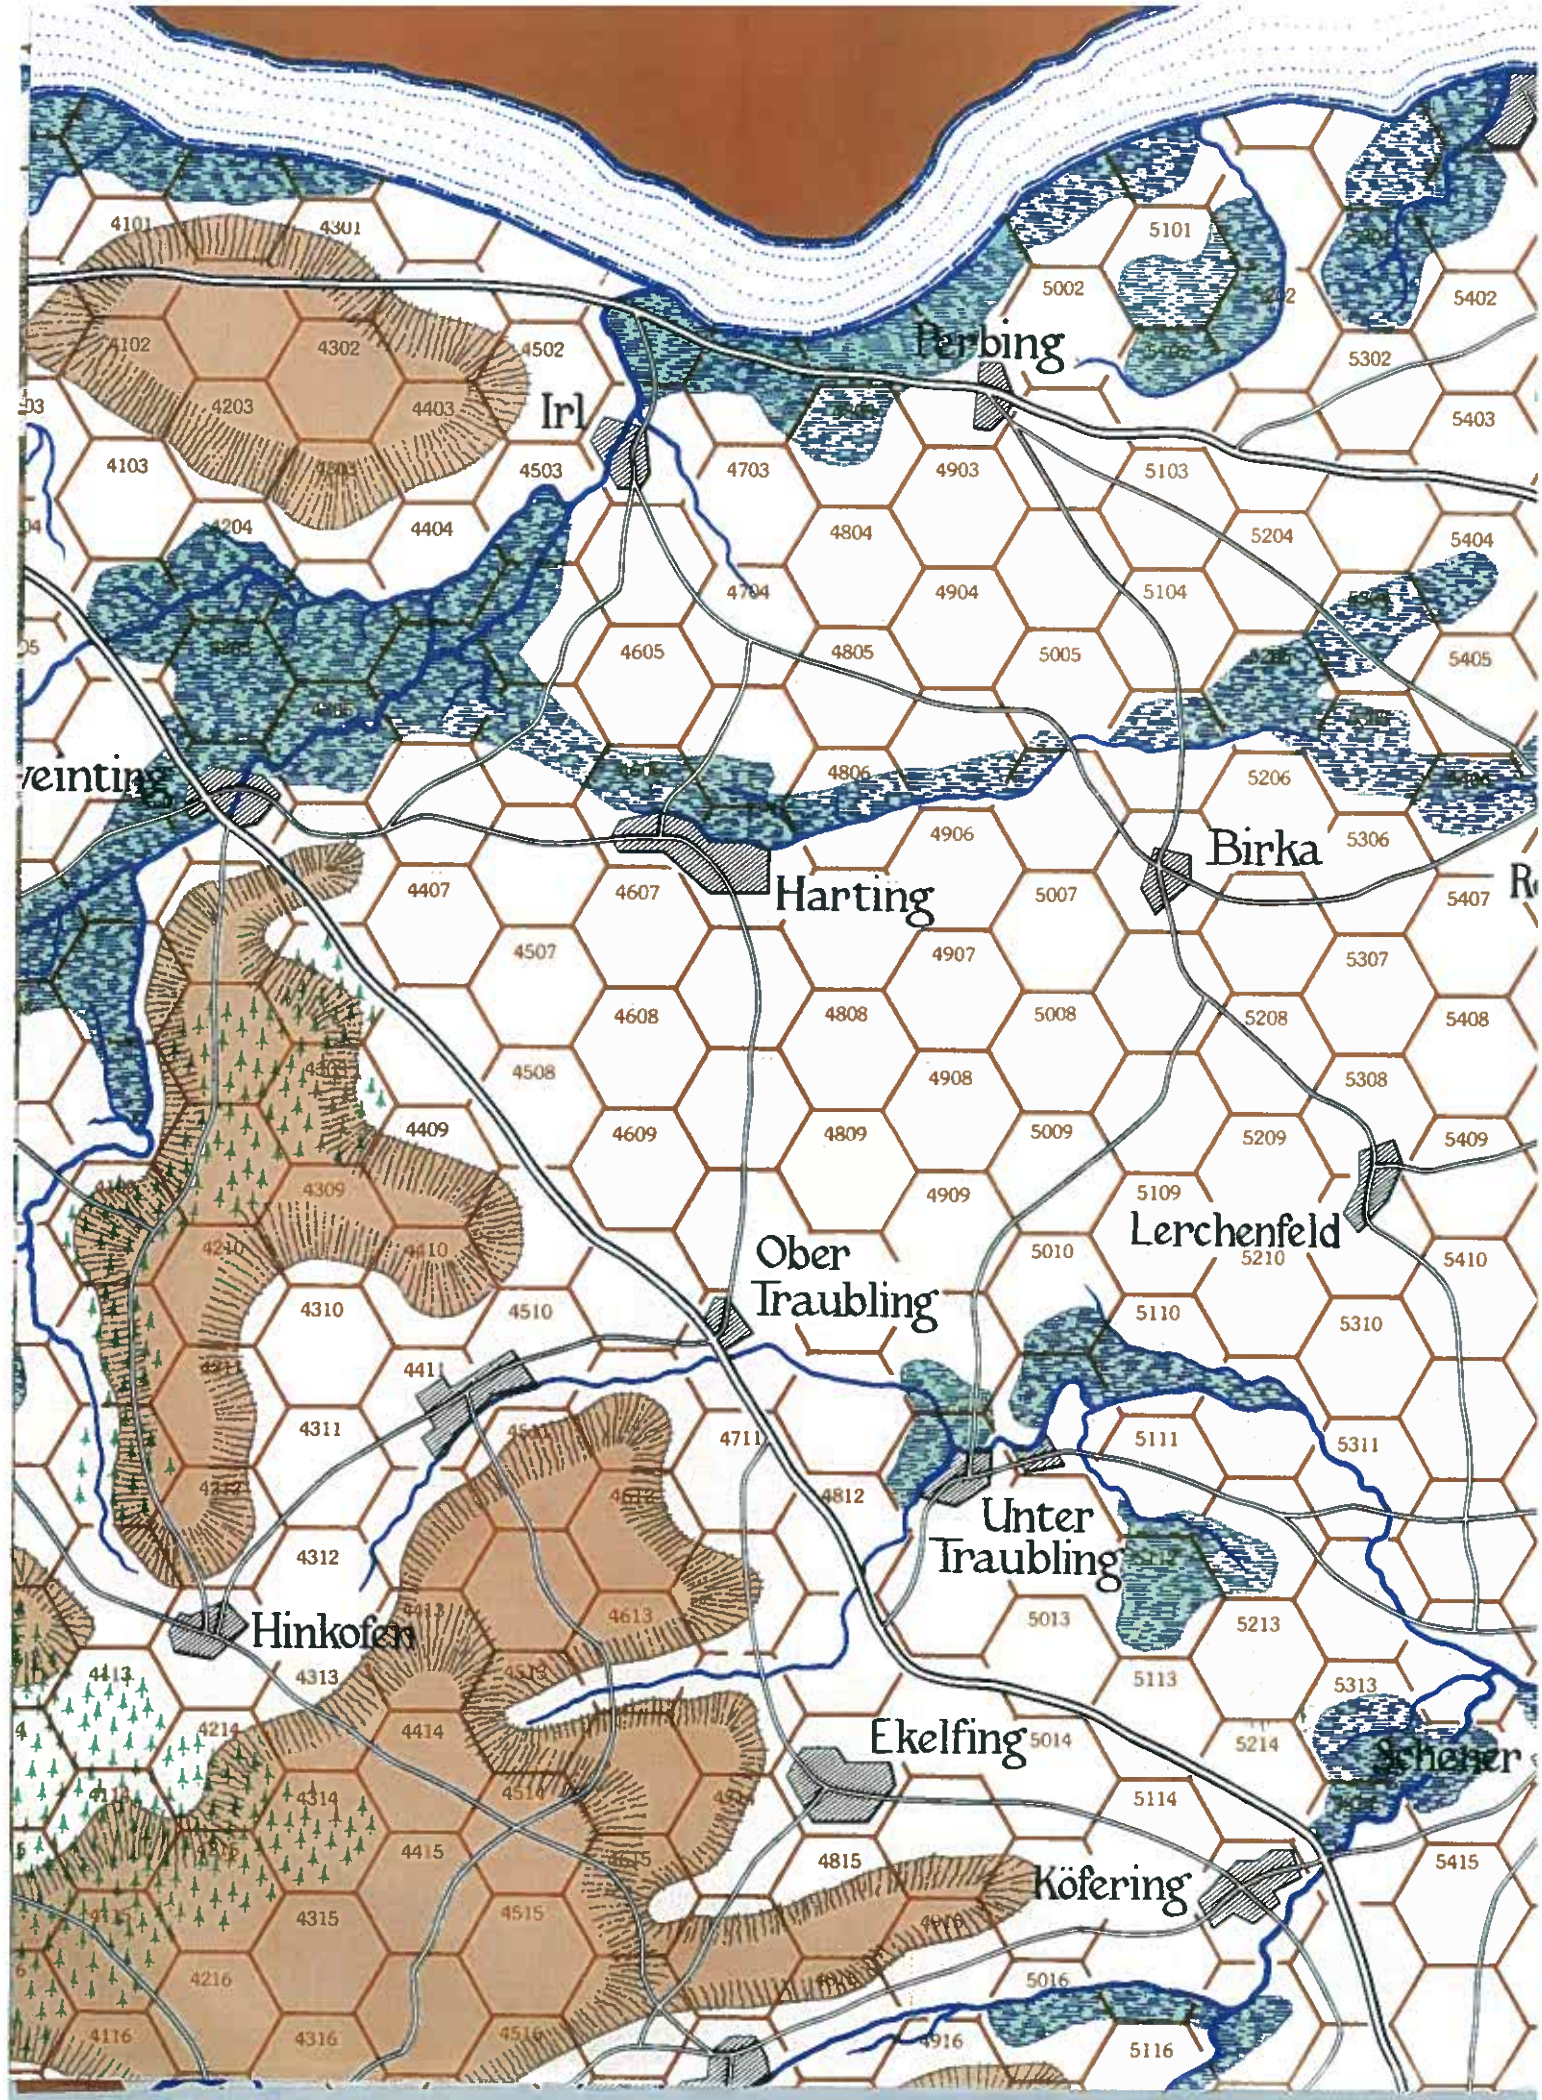

Notes:

- Units which enter enemy ZOC while using the road or track movement rate, may be fired upon in the immediately following enemy defensive fire phase as if they were in open terrain. In their following *offensive* fire phase, they suffer a -1 DRM when firing. The foregoing does *not* apply if the unit(s) entered enemy ZOC using the movement rate for the *other terrain* in the hex; in this case apply modifiers appropriate to that other terrain.
- Whenever a unit attempts to pass through another while using the *track movement rate*, a die must be rolled. *Both* units disrupt on a single die-roll of 1-3.
- A wooded hex is any hex with a tree symbol in it.
- Roll a die for each such hex entered.
- Units occupying village hexes do not suffer the effects of either enfilade fire or flank attacks. Nor may a unit defending in a village hex ever lose more than two strength points in a single phase, unless it surrenders.
- See note (4) at the foot of Melee CRT.
- Applies only to *Eckmühl* and campaign games.
- Units which advance to melee *from* a marsh hex suffer a L2 modifier. If two units advance to a single melee, one from marsh the other not, they suffer a L1 modifier. The foregoing does not apply if the unit(s) entered the marsh using the road or track movement rate.
- Where a single hex contains more than one type of terrain, movement costs and terrain effects are always the most severe possible.
